North Carolina
1991 Code book

Introduction

This code book documents data sets describing North Carolina motor vehicle accidents that occurred during calendar year 1991. The data sets were generated by the Transportation Data Center at the University of Michigan's Transportation Research Institute (UMTRI) from data provided by the North Carolina Department of Transportation. The cooperation of that agency is gratefully acknowledged.

The data set supplied by the North Carolina Department of Transportation contains one record for each crash. This structure has been reformatted into a set of three rectangular files. The characteristics of the three system data sets that have been developed are presented in the table below.

Characteristics of the North Carolina Data Sets

Data Set	Key	Freq	Variables
Accident	NC91ACC	178,725	1-50
Vehicle	NC91VEH	329,087	1-50,101-190,201-221
Occupant	NC91OCC	456,866	1-50,101-190,201-221, 301-307

The code book itself is divided into three sections that document the accident, vehicle & driver, and occupant records, respectively. The univariate frequencies and percentages displayed in each section are taken from the corresponding data set (i.e., vehicle and driver frequencies from NC91VEH, occupant frequencies from NC91OCC, etc.). An index at the end of the code book cross references words used in the code book by variable and code value number.

While every effort has been made to provide accurate, reliable data, inconsistencies may arise from the source data or from the reformatting procedures used. Consequently, the Data Center cannot guarantee the accuracy of the data, but will try to correct any discrepancies that are found. Please notify the Center of any errors or data inconsistencies that are uncovered as well as any suggestions or comments that you may have concerning the data or code book) by calling the Data Center at (313)-763-3230.
