North Carolina
2000 Codebook

Introduction

This codebook documents data sets describing North Carolina motor vehicle accidents that occurred during calendar year 2000. The data sets were generated by the Transportation Data Center at the University of Michigan's Transportation Research Institute (UMTRI) from data provided by the North Carolina Department of Transportation. The cooperation of that agency is gratefully acknowledged.

The data set supplied by the North Carolina Department of Transportation contains one record for each crash. This structure has been reformatted into a set of three rectangular files. The characteristics of the three system data sets that have been developed are presented in the table below.

Characteristics of the North Carolina Data Sets

Data Set	Key	Freq	Variables
Accident	NCØØACC	266,002	1-50
Vehicle	NCØØVEH	485,524	1-50,101-194,201-221
Occupant	NCØØOCC	703,501	1-50,101-194,201-221, 301-313

The codebook itself is divided into three sections that document the accident, vehicle & driver, and occupant records, respectively. The univariate frequencies and percentages displayed in each section are taken from the corresponding data set (i.e., vehicle and driver frequencies from NCØØVEH, occupant frequencies from NCØØOCC, etc.). An index at the end of the codebook cross references words used in the codebook by variable and code value number.

While every effort has been made to provide accurate, reliable data, inconsistencies may arise from the source data or from the reformatting procedures used. Consequently, the Data Center cannot guarantee the accuracy of the data but will try to resolve any discrepancies that are found. Any comments or suggestions concerning the data or the codebook may be made by calling the Data Center at (734) 763-3230 or by emailing TDC-UMTRI@umich.edu.
